

TriSys Agency Mobile App

Overview

The TriSys Agency Mobile App has been developed using the latest mobile platform technology and is available for Apple and Android operating systems, across mobile and tablet devices. The TriSys Candidate Mobile App is 100% flexible, enabling you to map any business processes to mobile app functionalities, with your own corporate branding.

Key Benefits

Your TriSys recruitment CRM database contains hundreds of thousands of candidate contacts and client contacts, therefore you will immediately experience a tremendous cost saving and competitive advantage by allowing candidates and clients to interact with your business using their mobile devices.

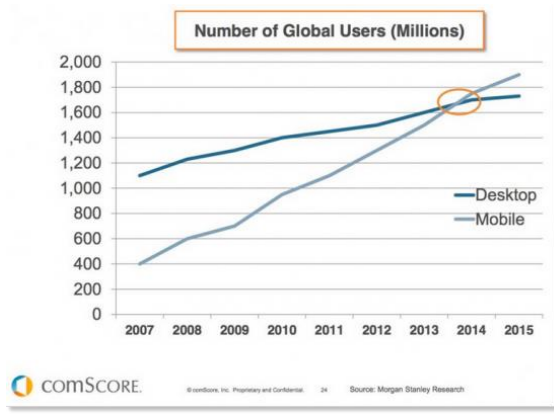

- Optimise TriSys CRM ROI
- Reduced job board spending
- Keeping in touch with Candidates
- Elimination of paper-based processes
- Record-keeping automation
- Faster time to hire
- Higher placement margins
- Reduction in email workflows
- Candidate self-service functionality
- Stronger agency branding
- Competitive differentiation
- Enable mobile recruitment processes
- Recruit anywhere, anytime on any device
- Timesheet workflow automation

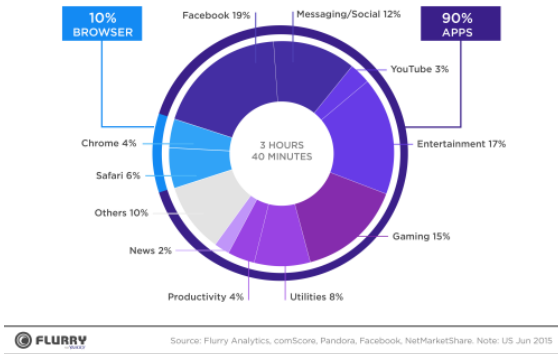

Choosing the TriSys Candidate Mobile App is the correct and most cost-effective decision, as it is entirely developed by the same company which develops your TriSys CRM database, whilst also offering the ideal combination of features, performance and user-friendliness.

Mobile Trends

Mobile device usage has outperformed desktop device usage ever since 2013, with users spending 90% of their mobile device time within mobile apps, which provide relevant content and functionality. For these reasons alone, a candidate mobile app is a non-optional asset for your business.

90% of Time on Mobile is Spent in Apps

Mobile App Deployment

Once your own branded candidate mobile app is ready, our team will deploy the app to the relevant App stores. You then send an email to your candidate and client community, advertising the availability of the mobile app.

One single mobile app, with your branding, will allow your candidates and clients (and also your recruitment teams) to login and perform the required activities.

Candidates
